PROJECTS

Memingo - Language Learning Platform Link — Sep '24 — Present

- Optimized leaderboard API performance by implementing **Redis caching**, reducing response time from 30 seconds to approximately 90ms and eliminating user drop-off to enable seamless real-time rankings
- Engineered a **real-time object detection** feature that scans items to instantly deliver vocabulary, cultural insights, and learning tips, creating a context-aware language learning tool.
- Designed and built 9 interactive lesson formats for diverse learning styles, increasing course completion and improving long-term retention.
- Integrated a **Gemini API-powered chatbot** to provide personalized learning paths and resources, accelerating average learner progression

Moodly- Experience Booking Platform — Aug '25 — Present

- Architected a real-time mood detection system using voice tone and facial expression analysis, powered by a **RabbitMQ event-driven pipeline** to dynamically personalize user experiences, significantly increasing satisfaction and retention.
- Built seamless booking and cancellation workflows with one-tap actions and instant confirmations, reducing transaction drop-off rates and streamlining user experience flow.
- Designed adaptive feedback loop analyzing post-experience reviews to dynamically refine recommendation algorithms, increasing repeat bookings and enhancing personalization accuracy.
- Implemented voice-command interface enabling hosts to create and manage experiences hands-free, accelerating content onboarding with real-time backend synchronization via event-driven architecture.

Leeds Financial Dashboard — FinTech, Digital Upgraders LLC Link — Jun '25 — Present, United States

- Architected and developed a centralized financial modeling platform that automated complex cost-benefit analysis and scenario simulations, eliminating manual Excel errors and accelerating investment decision-making for LEED projects.
- Engineered real-time data visualization and advanced filtering capabilities for Capex/Opex analysis and value premium calculations, enabling financial teams to perform multi-dimensional scenario comparisons instantly.
- Integrated dynamic cost adjustment features into the financial models, providing accurate, real-time investment positioning and empowering data-driven strategic planning.

SKILLS

Programming Languages Javascript, TypeScript, SQL, Python
Backend Node.js, Nest, Express.js, Mongoose, Fast Api, Flask
Databases MySQL, MongoDB, SQ Lite, PostgreSQL
Development Tools Android Studio, VS Code, IntelliJ IDEA, Postman, Eclipse, Pycharm
Frontend Html, CSS, React JS, TailwindCSS, Shadcn UI
Version Control Github, Git
AI & Third Party Servcies Swagger, Stripe, Open Ai, Gemini, Hugging Face Models
Mobile App Development React Native, Expo, Android SDK, Android
Cloud & DevOps Docker, RabbitMQ, Firebase, AWS, AWS S3, AWS RDS

CERTIFICATIONS

Master Microservices with SpringBoot, Docker, Kubernetes, Udemy — May '25

AWARDS

Runner-up, App Development Hackathon (2025) — May '25
Organized by Punjab University

Participant, Devathon Speed Programming Contest (2024) — Oct '24
Organized by Devsinc

Participant, CALICO Berkeley Speed Coding Competition (2024) — Dec '24
University of California, Berkeley

Ranked, ICPC Asia Topi Online Programming Contest (2024) — Nov '24
Organized by International Collegiate Programming Contests

EDUCATION

Bachelor's degree in Computer Science, University of Management and Technology - UMT — Oct '21 — Aug '25, Lahore, Pakistan
