SUMMARY

Java Software Engineer with 1+ year of production experience building enterprise-grade backend systems using Java, Spring Boot, and Spring Framework. Designed and delivered RESTful API microservices with Hibernate/JPA for ORM, Spring Security for authentication and RBAC, and Kafka for event-driven distributed architectures. Hands-on with Maven builds, JUnit unit testing, Docker containerization, GitHub Actions CI/CD, and AWS cloud deployments. Strong foundation in Object-Oriented Programming, design patterns, and distributed system architecture. Contributed a merged pull request to an Apache-maintained Java open source project (Checkstyle). Experienced delivering iteratively in Agile/Scrum environments across remote teams.

WORK EXPERIENCE

Full Stack Engineer Present
MicroTechX Malaysia (Remote)
Developed and maintained Java (Spring Boot) backend services for an enterprise IAM platform designing RESTful APIs, refactoring legacy monolithic modules into distributed microservices, and implementing event-driven workflows across 8+ services.

- Architected Kafka-based event-driven microservices for IAM audit trails and provisioning workflows configuring consumer concurrency, retry windows, dead-letter queues, and event schema validation across 8+ distributed Spring Boot services built and packaged with Maven.
- Implemented gRPC inter-service communication for user identity and manager resolution; refactored an O(n²) access-request lookup into an O(n) map-based strategy using Java Collections eliminating a critical performance bottleneck in the role-assignment approval flow.
- Enforced Spring Security-based authentication, JWT token validation, and RBAC access control across all service endpoints, wrote JUnit unit and integration tests for tile, cart, and request modules maintained GitHub Actions CI/CD pipelines for automated build, test, and deployment in Agile/Scrum sprint cycles.

Full Stack Engineer Jan '26
Digital Upgraders LLC United Arab Emirates (Remote)
Built and maintained production features for a social networking platform serving photographers, videographers, and creative professionals across web and mobile.

- Developed RESTful Node.js APIs with layered service architecture, DTO-based input validation, and Supabase (PostgreSQL) ORM queries applying Object-Oriented design principles consistent with Java/Spring Boot backend patterns.
- Implemented rate limiting on authentication and high-frequency endpoints, JWT-based session management, and structured audit logging enforcing secure API access patterns across all service layers.
- Resolved 20+ production bugs spanning auth validation, notification lifecycle, cache invalidation, and protected route enforcement, maintained unit test coverage across critical API flows and validated fixes against multi-scenario edge cases before deployment

Open Source Developer Feb '26 — Present
CheckStyle Remote

- Contributed to an Apache-maintained Java static analysis tool by submitting a merged pull request improving documentation for the JavadocCommentsTokenTypes module.
- Added and documented the EQUALS token behavior, improving clarity for developers configuring Javadoc comment rules.
- Merged PR: https://github.com/checkstyle/checkstyle/pull/18807 improving documentation in a widely used Java static analysis tool used across thousands of production codebases.

PROJECTS

TickoJet - Event Booking Platform Link

- Built a **Spring Boot REST API** for an event ticket booking platform enabling users to register, browse events, and manage bookings with secure JWT-based authentication and role-based access control.
- Integrated Stripe for secure ticket payment processing and used Redis caching to fetch trending events instantly, improving performance by 35%.
- Implemented **rate limiting and Spring Security**, strengthening API protection against abuse and unauthorized access.

Moodly- Experience Booking Platform Link Aug '25 — Present

- Architected a real-time mood detection system using voice tone and facial expression analysis, powered by a RabbitMQ event-driven pipeline to dynamically personalize user experiences, significantly increasing satisfaction and retention.

- Built RESTful backend APIs for booking lifecycle management with TypeScript-strict service layers, input validation, secure authentication, and unit-tested business logic supporting seamless integration with the React Native frontend.
- Implemented voice-command interface enabling hosts to create and manage experiences hands-free, accelerating content onboarding with real-time backend synchronization via event-driven architecture.

Memingo - Language Learning Platform Link Sep '24 — Present

- Optimized leaderboard API performance by implementing Redis caching, reducing response time from 30 seconds to approximately 90ms and eliminating user drop-off to enable seamless real-time rankings
- Built a real-time object-detection module that identifies items and instantly delivers vocabulary, cultural context, and learning tips, transforming the app into a highly context-aware language learning experience
- Integrated a Gemini API-powered chatbot to provide personalized learning paths and resources, accelerating average learner progression

SKILLS

Programming Languages SQL, Java
Core Java Java, Java 8, Java 17, Collections, Generics, Mulithreading
Spring Ecosystem Spring Data, Spring Security, Spring Cloud, Spring MVC
Frontend Html, CSS, React JS, TailwindCSS, Shadcn UI, Next.js, CSS3
Databases MySQL, MongoDB, SQ Lite, PostgreSQL, Supabase, MariaDB, Redis
Development Tools Android Studio, VS Code, IntelliJ IDEA, Postman, Eclipse, Pycharm
Version Control Github, Git
AI & Third Party Servcies Swagger, Stripe, Open Ai, Gemini, Hugging Face Models
Cloud Firebase, AWS, AWS S3, AWS RDS, Dokploy
Search Redis, ElasticSearch
Methodology Agile, Scrum, Scrum (Software Development), Scrum Methodology, Scrum Best Practices
AI Tools Claude, Gemini, Github Copilot, Cursor
DevOps CI/CD pipelines, Github Actions, Docker, Kubernetes
Observability Structured logging, Audit Trails, Error tracking
Testing JUnit, Jest
Build tools Maven, Gradle
Messaging Apache Kafka, RabbitMQ, WebSockets

CERTIFICATIONS

Master Microservices with SpringBoot, Docker, Kubernetes, Udemy May '25

AWARDS

Runner-up, App Development Hackathon (2025) May '25
Organized by Punjab University

Participant, Devathon Speed Programming Contest (2024) Oct '24
Organized by Devsinc

Participant, CALICO Berkeley Speed Coding Competition (2024) Dec '24
University of California, Berkeley

Ranked, ICPC Asia Topi Online Programming Contest (2024) Nov '24
Organized by International Collegiate Programming Contests

EDUCATION

Bachelor's degree in Computer Science, University of Management and Technology - UMT Oct '21 — Aug '25
Lahore, Pakistan
