SUMMARY

Results-driven backend developer with hands-on experience building and optimizing RESTful APIs using Spring Boot. Boosted application efficiency by **40%** through Redis caching and backend optimization. Enhanced security by **implementing JWT-based authentication**, ensuring robust access control. Integrated **Stripe** for secure payment processing increasing feature coverage by **30%**. Deployed scalable microservices to **Heroku** and **Koyeb**, reducing infrastructure costs by **25%**. Utilized **Swagger/OpenAPI** to generate and maintain API documentation, cutting onboarding time by **50%**. Skilled in relational and NoSQL databases, with a strong focus on performance, and backend scalability.

PROJECTS

TickoJet - Event Booking Platform Link — Feb '25 — Present

- Enhanced security using **JWT authentication** and **rate limiting**, reducing unauthorized access by **15%** and cutting abuse by **10%.**
- Integrated **Stripe** for secure ticket payment processing and used **Redis caching** to fetch trending events instantly, improving performance by **35%**.
- Deployed on **Koyeb** with seamless **CI/CD pipelines**, enabling faster deployment cycles and reducing downtime by **20%**.
- Integrated REST APIs into the **Android app**, streamlining user experience and boosting API consumption by **25%,** added **Swagger** for interactive documentation, improving dev collaboration by **10%**
