# Muhammad Talha Atif

Software Engineer

03064391520 ◇ talhaatif573@gmail.com ◇ Shadab, Lahore, Punjab, Pakistan ◇ Open to Remote ◇ LinkedIn

## SUMMARY

I specialize in developing high-quality, maintainable Android applications using Kotlin, Java, and Python. With expertise in assessing risk and transforming innovative ideas into scalable solutions, I create robust applications leveraging frameworks like Android SDK and seamlessly integrating backend services. My experience focuses on solving complex challenges specific to Android platforms, ensuring optimal performance and intuitive user experiences.

## WORK EXPERIENCE

**Software Engineer Fellow** Jul '24 — Sep '24
Headstarter • United States United States (Remote)

- Developed and deployed multiple web applications in 5 weeks using Next.js, Material UI, and Firebase.
- Completed mock technical interviews, enhancing problem-solving, system design, and technical communication skills.

**Android Developer** Jul '24 — Aug '24
HiSkyTech Sialkot, Pakistan (Remote)

- Developed and deployed 4 Android applications within a month using Kotlin, Firebase, Retrofit, and third-party libraries, while applying agile methodologies.
- Tackled integration challenges, such as implementing complex charts and data visualization features, enhancing app functionality.
- Focused on solving real-world integration problems independently, enhancing technical problem-solving and self-management skills.

## PROJECTS

Budget Tracker Application, HiSkyTech Link Jul '24 — Aug '24

- Developed a Budget Tracker app using Kotlin and Firebase, showcasing my passion and self-motivation in building tools for financial management.
- Features include income/expense tracking, currency support (PKR, Euro, USD), and visual pie charts for analysis.
- Integrated Firebase Firestore for secure authentication and real-time updates, with persistent login for a seamless user experience.

Job Portal Application, HiSkyTech Aug '24 — Aug '24

- Developed an admin and client app for job management using Firebase and Kotlin.
- The admin app allows job posting, deletion, and management, while the client app enables users to apply for jobs, upload resumes, and chat with other users.

Focus Frame, Fiverr Jun '24 — Jul '24

- Collaborated with a teammate to develop a productivity app featuring nearby library search, quotes, Pomodoro technique, notes with reminders, cue card creation, and voice-to text notes.
- Handled API integrations, UI/UX design, and voice input functionality, using Kotlin and Firebase for real-time data sync and reminders.

## SKILLS

**Programming Languages** C++, Kotlin, Python, SQL, Java, C#
**Development Tools** Android Studio, Eclipse, IntelliJ, Visual Studio, VS Code
**Version Control** Gitbash, Github
**Database Management** Database Design, MySQL, Firebase, MongoDB, SQL lite, Room
**Software Design** Data Structures and Algorithms, MVVM, Object-Oriented Design, Retrofit, XML, Android Development, MVC, HTML, CSS, Bootstrap

## EDUCATION

**Bachelor's degree in Computer Science,** University of Management and Technology - UMT (GPA: GPA: 3.70/4.00) Oct '21 — Present
Lahore, Pakistan

- Programming Fundamentals
- Object Oriented Programming
- Databases
- Data Structures
- Machine Learning
