SUMMARY

Full Stack Developer with 2+ years of production experience building end-to-end web systems across Python, FastAPI, React, TypeScript, Node.js, and Java. Delivered distributed backend services, RESTful APIs, and AI inference pipelines in production with hands-on LLM integrations using Hugging Face, Gemini API, and LangChain. Comfortable with Docker, AWS, CI/CD pipelines, and PostgreSQL schema design. Experienced building in early-stage environments with shifting priorities, taking full ownership of features from concept through production. Familiar with Django patterns and actively building with LangGraph for agentic AI workflows.

WORK EXPERIENCE

Full Stack Developer *Dec '25 – Present*
Intimec via MicroTechX Remote

Built and owned backend services and React/Next.js frontend modules for an enterprise IAM platform, designing distributed microservices, event-driven workflows, REST APIs, and analytics dashboards across a compliance-heavy production system.

- Designed and built RESTful APIs and event-driven microservices with Kafka across 8+ distributed services, enforcing RBAC, JWT authentication, and input validation with structured audit logging at every state transition.
- Built workflow analytics platform with 5 REST endpoints, 8 KPI drilldown types, and time-window filtering, backed by PostgreSQL aggregation queries using JPA projections to keep memory footprint low on large datasets.
- Led zero-downtime OpenSearch migration reindexing 5M+ documents via alias switching, and designed bulk assignment API supporting 5,000+ records per operation using batch queries with flat latency regardless of payload size.

Full Stack Developer *Sep '25 – Jan '26*
Digital Upgraders LLC Remote

Shipped full stack features for a production social platform, owning Node.js backend APIs, React frontend components, PostgreSQL schema, and Docker-based cloud infrastructure.

- Resolved a feed API bottleneck by adding PostgreSQL indexes on read-heavy columns, pruning unused DTO fields, optimising queries, and adding Redis in-memory cache, reducing response time from 3 seconds to 700ms in production.
- Fixed a notification race condition by replacing non-transactional writes with proper database transactions, eliminating duplicate events under concurrent load.
- Led zero-downtime production migration covering Docker, DNS, and cloud environment setup with GitHub Actions CI/CD pipelines for automated deployment.

PROJECTS

Moodly | AI Agentic Booking Platform | Demo

- Built Python FastAPI inference service integrating HuBERT via Hugging Face Transformers for voice emotion classification and DeepFace for facial analysis, with RabbitMQ async pipeline decoupling inference from the booking engine under load.
- Designed prompt-driven recommendation logic using Gemini API with structured output parsing, session-aware context, and tool-calling patterns, currently extending to a LangGraph agentic workflow for multi-step experience personalisation.
- Shipped cross-platform React Native frontend with one-tap booking flows, mood visualisation, and voice-command host interface, deployed on AWS with Docker and GitHub Actions CI/CD.

Memingo | AI Language Learning Platform | Demo

- Resolved leaderboard bottleneck by replacing per-request computation with Redis precomputed cache, reducing API response from 30 seconds to 90ms.
- Integrated Gemini API LLM chatbot with session-aware context management and structured output parsing for

personalised learning recommendations across sessions.

SKILLS

Backend Python, FastAPI, Java, Spring Boot, Node.js, Express.js, NestJS, REST APIs, Django (familiar)
Frontend React.js, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Vite (familiar)
AI / LLM LangChain, LangGraph, Hugging Face Transformers, Gemini API, OpenAI API, tool calling, RAG
Databases PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase, Hibernate/JPA, OpenSearch
Cloud / DevOps AWS (S3, RDS, EC2), Docker, GitHub Actions, CI/CD, GCP (familiar), Fly.io
Auth / Security JWT, OAuth 2.0, RBAC, rate limiting, Spring Security, input validation
Tools Git, GitHub, Postman, Swagger, Claude AI, GitHub Copilot

AWARDS

Runner-up, App Development Hackathon (2025) *May '25*
Organized by Punjab University

Ranked, ICPC Asia Topi Online Programming Contest (2024) *Nov '24*
Organized by International Collegiate Programming Contests

EDUCATION

Bachelor's degree in Computer Science, University of Management and Technology – UMT *Oct '21 – Aug '25*
